

UNO eCommerce

See more, do more with UNO & Dynamics NAV

Optimize your ERP and eCommerce applications

If you are...

- 1 Manually entering eCommerce orders into your ERP system?
- 2 Comparing data from your eCommerce and ERP systems?
- 3 Using outdated reports to make decisions?

... then it's time for a new solution that saves you time, improves data accuracy, and serves your customers more efficiently.

Introducing UNO

**for Dynamics NAV, Dynamics
365 Business Central**

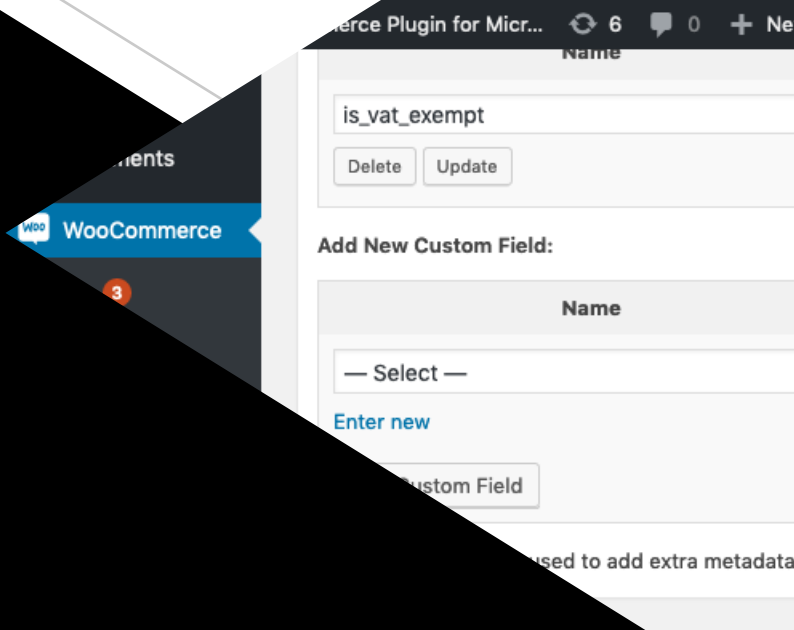

UNO is a flexible and scalable app that integrates your Microsoft Dynamics NAV/ Business Central with Wordpress e-commerce web portal. The result is real-time data updates for better data, more sales, and improved decision making.

With Uno, you can create web stores for customers and partners for:

- **Ecommerce - B2C**
- **B2B**
- **B2B2C**
- **Vendor portals**
- **Internal Sales Rep portal**

UNO is designed to support Microsoft Dynamics NAV or Microsoft Dynamics 365 Business Central, the most popular ERP systems now available for their robust capabilities. Using UNO, you'll benefit from:

- **Real time updates**
- **Responsive, user friendly interface**
- **Improved inventory tracking**
- **Customer data analytics**
- **Customer synchronization**

Product Overview

Transform your business by synchronizing your ERP with web portals, such as Ecommerce, customer, vendor and team portals. Simply configure our Wordpress plugin for Microsoft Dynamics and instantly integrate Dynamics NAV, Dynamics Business Central and Dynamics 365/AX solution with WordPress Ecommerce.

Product Catalog & Inventory Management

- Import all your products (Simple and Variable)
- Synchronization of attributes
- Product Grouping
- Automatic Synchronization

Orders Management

- Create new sales quotes/ orders
- Manage Order statuses
- Auto synchronise shipping and tracking details
- Auto synchronize invoices

Customer Management

- Register new customers and synchronise the details in ERP
- Manage shipping and billing addresses.
- Synchronizing existing customers
- Manage Order History and invoices

THE RESULTS?

Better data and greater productivity

→ Improved productivity and less manual data entry

→ Inventory tracking that reflects real time sales, purchases, and adjustments

→ Integrated data with customer and business partner portals

→ Data driven decision making based on real time data transactions

→ Time, money, and labor savings from streamlined operations
